Professional Summary

Senior Android Developer with 11+ years of experience in building scalable, high-performance Android applications using Kotlin and Java. Strong expertise in Android SDK, MVVM architecture, Dependency Injection (Hilt), REST API integration, SQLite, and third-party libraries. Experienced in accessibility implementation and testing to ensure inclusive and WCAG-compliant Android applications. Proven team lead with excellent problem-solving and communication skills.

Core Skills

Languages: Kotlin, Java

Android: Android SDK, MVVM, Jetpack, LiveData, ViewModel, Data Binding, Navigation Component

Dependency Injection: Hilt, Dagger

Data & APIs: SQLite, Room, DataStore, REST APIs, Retrofit, Moshi, Gson, JSON

Async: Coroutines, Flow, WorkManager

Backend: Node.js, MySQL (Stored Procedures), Express

Testing: JUnit, Espresso, Unit & UI Testing

Tools: Git, Android Studio, Firebase, Crashlytics, LeakCanary, Postman, Jenkins, GitHub Actions, CI/CD

Professional Experience

Senior Software Engineer – Android – TalentMicro Innovations Pvt Ltd (Oct 2020 – Present)

- Developed and maintained Android applications using Kotlin, Java, and Android SDK following MVVM architecture.
- Integrated REST APIs using Retrofit with Coroutines and Flow for efficient asynchronous data handling.
- Implemented local persistence using SQLite/Room for offline-first features.
- Added and tested accessibility features including TalkBack support, proper labels, and focus navigation.

- Wrote unit tests using JUnit and UI tests using Espresso to ensure app stability and quality.
- Collaborated with cross-functional teams using Agile methodologies and Git-based version control.
- Led the modernization of an 80+ Activity codebase, migrating from SharedPreferences to Hilt dependency injection and Jetpack DataStore to improve testability and maintainability.
- Built and maintained Node.js (Express) backend services, including converting complex MySQL stored procedures to parameterized Node.js queries for core job-matching workflows.
- Mentored junior engineers through code reviews and architectural guidance, contributing to a reduction in production crash reports across the app.

Software Engineer – Android – HireCraft Software Pvt Ltd (Apr 2016 – Oct 2020)

- Built modular Android applications using Kotlin/Java and MVVM architecture.
- Integrated third-party SDKs and libraries to enhance app functionality and performance.
- Improved accessibility compliance by adding localization, scalable fonts, and screen reader support.
- Participated in code reviews, sprint planning, and Agile ceremonies.

Junior Android Developer – Benchmark Business Software (Jul 2014 – Apr 2016)

- Developed and debugged core Android features with focus on performance optimization.
- Added localization & accessibility features, increasing reach to a wider audience.

Projects

- **Tallite (2021–Present) – [Link](#) – 4.5★ | 100+ downloads**
Global recruitment platform. Built backend modules (Flask & FastAPI) for job workflows, referral tracking, authentication, real-time status updates.
- **TalliteSS (2021–Present) – [Link](#)**
HR suite for staffing & RPO. Developed backend services for candidate profiling, job order management, role-based access, and workflow automation.

- CVMine (2020–Present) – [Link](#) – 5.0★
Job platform with TAL token rewards. Built secure backend APIs for CV encryption, employer-agent connections, and job search.
- WhatMate (2020–Present) – [Link](#) – 4.1★ | 10,000+ downloads
AI-driven enterprise automation app. Developed Android features and optimized backend communication for faster task execution.
- FileShore (2023–Present) – [Link](#)
Cloud document management platform. Built secure sharing, multi-factor authentication, and multi-level e-sign workflows.

Education

B.Tech – Information Technology

Dr. Sivanthi Aditanar College of Engineering, Tiruchendur, Tamil Nadu (2010 – 2013)

Personal Information

DOB: 19 July 1992 | **Location:** Chennai, Tamil Nadu, India
